KEEP DAIRY COLD

Swede Farms

Quality Dairy Products

TEMPERATURE CONTROL IS IMPORTANT

One degree affects product keeping quality

For best product protection, store milk and milk products at 32°F to 40°F.

Average shelf life at 40°F is 10 days. This decreases rapidly at higher temperatures.

Store all dairy products in properly refrigerated zone.

Store ice cream at -10°F to -20°F.

Do not stack products over cooling vents.
